

## **"Make the difference"**

Team building events are most commonly viewed as being fun and a "good day out of the office". This is a team building event with a difference.

More and more companies are serious about corporate social responsibility, so why not learn how to be more effective as a team whilst serving the community?

Following a consultation with you, finding out the key areas you wish to develop, we source a local community project to work on and facilitate the session to ensure you go back to the work place as a higher performing team.

Whether you need to explore:

Team communication

Ways to work under pressure

How to set goals and achieve them (if not exceed them!)

Adapting to changes in team

Working as a multi-site team

to name but a few... we can tailor the event to try out, reflect upon and learn new ways to work better together. At the end of the day we capture the teams learning's and help you produce your action plan to "make the difference" back in the workplace.

In addition you will have helped a part of your local community - making a difference to them too!
